## EDITORIAL

60 YEARS OF POMC: POMC: the consummate peptide hormone precursor  
*Adrian J L Clark & Philip Lowry* E1-E2

## THEMATIC REVIEWS

60 YEARS OF POMC: Purification and biological characterisation of melanotrophins and corticotrophins  
*Philip Lowry* T1-T12

60 YEARS OF POMC: Lipotropin and beta-endorphin: a perspective  
*D G Smyth* T13-T25

60 YEARS OF POMC: The proopiomelanocortin gene: discovery, deletion and disease  
*Adrian J L Clark* T27-T37

60 YEARS OF POMC: N-terminal POMC peptides and adrenal growth  
*Andrew B Bicknell* T39-T48

60 YEARS OF POMC: From the prohormone theory to pro-opiomelanocortin and to proprotein convertases (PCSK1 to PCSK9)  
*Michel Chrétien & Majambu Mbikay* T49-T62

60 YEARS OF POMC: From POMC and  $\alpha$ -MSH to PAM, molecular oxygen, copper, and vitamin C  
*Dhivya Kumar, Richard E Mains & Betty A Eipper* T63-T76

60 YEARS OF POMC: Biosynthesis, trafficking, and secretion of pro-opiomelanocortin-derived peptides  
*Niamh X Cawley, Zhaojin Li & Y Peng Loh* T77-T97

60 YEARS OF POMC: Transcriptional and epigenetic regulation of POMC gene expression  
*Jacques Drouin* T99-T112

60 YEARS OF POMC: POMC: an evolutionary perspective  
*Sandra Navarro, Lucia Soletto, Sara Puchol, Josep Rotllant, Jose Luis Soengas & Jose Miguel Cerdá-Reverter* T113-T118

*Contents continued on the inside back cover*

0952-5041 (201605) 56:4;1-Y

Contents continued from outside back cover

- 60 YEARS OF POMC: Melanocortin receptors: evolution of ligand selectivity for melanocortin peptides** T119-T133  
*Robert M Dorés, Liang Liang, Perry Davis, Alexa L Thomas & Bogdana Petko*
- 60 YEARS OF POMC: Adrenal and extra-adrenal functions of ACTH** T135-T156  
*Nicole Gallo-Payet*
- 60 YEARS OF POMC: Regulation of feeding and energy homeostasis by  $\alpha$ -MSH** T157-T174  
*Erica J P Anderson, Isin Çakir, Sheridan J Carrington, Roger D Cone, Masoud Ghamari-Langroudi, Taneisha Gillyard, Luis E Gimenez & Michael J Litt*
- RESEARCH**
- Autophagy protects osteoblasts from advanced glycation end products-induced apoptosis through intracellular reactive oxygen species** 291-300  
*Lei Yang, Hongzheng Meng & Maowei Yang*
- SGK1 inhibitor reverses hyperglycemia partly through decreasing glucose absorption** 301-309  
*Ping Li, Yan Hao, Feng-Hui Pan, Min Zhang, Jian-Qiang Ma & Da-Long Zhu*
- 3,5-T<sub>2</sub> alters murine genes relevant for xenobiotic, steroid, and thyroid hormone metabolism** 311-323  
*Julika Lietzow, Janine Golchert, Georg Homuth, Uwe Völker, Wenke Jonas & Josef Köhrle*
- Prohibitin regulates the FSH signaling pathway in rat granulosa cell differentiation** 325-336  
*Indrajit Chowdhury, Kelwyn Thomas, Anthony Zeleznik & Winston E Thompson*
- Foxo3b but not Foxo3a activates *cyp19a1a* in *Epinephelus coioides*** 337-349  
*Qiongyou Liu, Yang Zhang, Boyang Shi, Huijie Lu, Lihong Zhang & Weimin Zhang*
